(54) UNDERFLOOR STRUCTURE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an underfloor structure capable of preventing mold or noxious insects from breaking out or propagating and keeping the environment in the under floor favorably.

SOLUTION: This underfloor structure having a ground 10 bottom face and surrounded by a continuous footing 12 at the periphery and a floor face 16 arranged at the upper face to define a underfloor space S. In this case, the structure is provided with a member containing titanium oxide such as a moisture-adjusting bag body 32 in which a moisture-adjusting material 34 is contained in the container container bag 30 holding titanium oxide and an ultraviolet ray-irradiating source 40 arranged in the underfloor space S.
